### PROFILE

As a dedicated and passionate professional, I pride myself on being a hardworking and quick learner with a cooperative spirit. My enthusiasm for embracing new challenges fuels my drive to continuously expand my skill set, particularly through engaging in projects that leverage the latest technologies.

My outgoing personality is complemented by exceptional communication skills and a meticulous attention to detail. These attributes enable me to thrive in high-pressure environments, where I effectively manage and navigate stressful situations with poise.

### INTERNSHIP

#### Frontend Developer Intern

FOO\_

Mar 2024 - Jun 2024

**Angular , Laravel , PWA , Web Speech Api , Ionic , Tailwind**

- Spearheaded the development of a Progressive Web Application (PWA) for an e-commerce platform using Angular and Laravel. Key features included product management, real-time notifications, and multilingual support (Arabic and English).
- Innovated with Web Speech API to enable voice command functionalities, enhancing user interaction and accessibility, and allowing users to add products via speech input.
- Executed the migration of a Laravel-Angular project to a cross-platform mobile application using the Ionic framework, significantly improving mobile user experience.
- Gained proficiency in advanced frontend and backend technologies, including Angular, Ionic, and Laravel, as well as expertise in PWA and cross-platform mobile app development.
- Developed a comprehensive understanding of frontend development, demonstrating exceptional problem-solving abilities and a commitment to creating responsive, user-centric web applications within a collaborative team setting.

### SIDE PROJECTS

#### • React Project: User and Product Management:

- Developed Two Dynamic Pages: Created /users and /products pages using React JS with reusable components.
- API Integration: Utilized the DummyJSON API for data fetching, implementing filters and pagination with Axios.
- Filters and Pagination: Implemented dynamic page size options (5, 10, 20, 50) and a client-side search filter. Enabled pagination to dynamically fetch and display data.

#### • React Project: Interactive Portfolio:

- 3D Models with Three.js: Integrated Three.js to display interactive 3D models, enhancing visual appeal and user engagement.
- Messaging with EmailJS: Implemented EmailJS to enable users to send messages directly through the website, facilitating seamless communication.
- Styled with Bootstrap: Utilized Bootstrap to ensure a modern, responsive design and consistent user experience across devices.

#### • Rest API :

- Developed using Express.js and Node.js.

#### • Movie Fight

- Utilized JS, HTML, and Bulma to compare movie ratings and display results from an API

#### • University Projects:

- **Restaurant Website:** Developed user and admin interfaces using HTML, CSS, JavaScript, and PHP. (Teamwork)
- **Shop Management System:** Created database, procedures, triggers, functions, and web application for user and admin sides with SQL Server and MySQL. (Teamwork)
- **Song Voting System:** Developed a GUI application using JavaFX. (Teamwork)
- **Send and Browse CV:** Built a web application using ASP.NET Core 5.
